B. Temelji varstva zasebnosti

Introducing protection of privacy

Domači

Ustava RS

Kazenskopravno, civilnopravno varstvo

Mednarodni

EKČP: pravica do spoštovanja zasebnega in družinskega življenja, doma in dopisovanja, 8. člen

Constitution

Criminal law, civil law protection

International

ECHR: the right to respect for private and family life, home and correspondence, Article 8

Constitution vs. ECHR

Merila posegov v zasebnost po EKČP so strožja?

Legitimni cilji posega: razlogi nacionalne varnosti, gospodarske blaginje države, preprečevanje neredov, preprečevanje kaznivih dejanj, varovanje zdravja, varovanje morale, varstvo pravic/svoboščin drugih – EKČP, 8/2

Are the criteria for privacy interventions under the ECHR stricter?

Legitimate objectives of the intervention: reasons of national security, economic prosperity of the state, prevention of riots, prevention of criminal offenses, protection of health, protection of morals, protection of the rights / freedoms of others - ECHR, 8/2

Merila posegov v zasebnost po URS so strožja?

Sodna odločba (nedotakljivost stanovanja, kom. zas.) - 36, 37 URS

Posegi v kom. zas.: uvedba/tek kazenskega postopka, varnost države – 37 URS

Are the criteria for privacy interventions according to the URS stricter?

Court decision (inviability of the dwelling, comm. privacy) - 36, 37 URS

Interventions in comm. privacy: criminal proceedings, state security - 37 URS

»The right of the people to be secure in their **persons, houses, papers, and effects**, against **unreasonable searches and seizures**, shall not be violated, and no **warrants** shall issue, but upon **probable cause**, supported by oath or affirmation, and **particularly describing** the place to be searched, and the persons or things to be seized.«

- IV. amendment to the US Constitution

»The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue, but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.«

- IV. amendment to the US Constitution

Razvoj: Privilegij zoper samoobtožbo v. varstvo zasebnosti? Development: privilege against self-incrimination vs. privacy protection

»For the 'unreasonable searches and seizures' condemned in the fourth amendment are almost always made for the purpose of compelling a man to give evidence against himself /.../ And we have been unable to perceive that the seizure of a man's private books and papers to be used in evidence against him is substantially different from compelling him to be a witness against himself.«

- Boyd v. US, 1889

Kako razlikovati med zasebnostjo in pravico do molka?

Pravica do molka le v primeru zaslišanja ali njegovih ekvivalentov.

Pasivnost obd. pri posegih v zasebnost – gradivo dosegljivo mimo volje obd.

»For the 'unreasonable searches and seizures' condemned in the fourth amendment are almost always made for the purpose of compelling a man to give evidence against himself /.../ And we have been unable to perceive that the seizure of a man's private books and papers to be used in evidence against him is substantially different from compelling him to be a witness against himself.«

- Boyd v. US, 1889

How to distinguish between privacy and the right to remain silent?

The right to remain silent applies only in the event of an interview/hearing of the alleged perpetrator or its equivalents.

Passivity of the alleg. perp. in cases of invasion of privacy - material available against the will of the alleg. perp.

Lastninski koncept varstva zasebnosti

Trespass concept of privacy protection

Ali gre za kršitev zasebnosti, če policija prisluškuje pogovorom v prostoru, po telefonu ipd. tako, da ne poseže v posest prostora?

Olmstead v. US, 1928: NE

Ločeno mnenje sodnika Brandeisa

Is it a violation of privacy if the police eavesdrop on conversations in the room, on the phone, etc. without trespassing?

Olmstead v. US, 1928: NO

Separate opinion of Judge Brandeis

Koncept (razumnega) pričakovanja zasebnosti: ZDA

Reasonable expectation of privacy: USA

Ali pomeni poseg v zasebnost prisluškovanje tel. pogovoru z napravo, pritrjeno na steno tel. govorilnice?

ZDA: Katz. v. US, 1967: DA

Poudarki:

- Pravica do zasebnosti varuje ljudi, ne prostore
- Ne-varovano? Kar oseba hote izpostavi javnosti (tudi če doma ali v pisarni)
- Varovano? Kar oseba želi zadržati kot zasebno (tudi če je dosegljivo javnosti)

Kasnejši razvoj: opravičljivost, razumnost pričakovanj posameznika

Does the invasion of privacy occur when wiretapping a telephone conversation with a device attached to the outer wall of the phone booth?

USA: Katz. v. US, 1967: YES

Highlights:

- The right to privacy protects people, not premises
- Unprotected? What a person intentionally exposes to the public (even if at home or in the office)
- Protected? What a person wants to keep private (even if available to the public)

Subsequent development: justifiability, reasonableness of individual expectations

Koncept (razumnega) pričakovanja zasebnosti: ECHR

Reasonable expectation of privacy: ECHR

Ali je varovana zasebnost policistke, ki službeni telefon uporablja za neslužbene potrebe?

Halford v. UK, 1987: DA

Pomembna:

- ni bilo opozorila delod., da bi bili lahko pogovori prestreženi
- izključna uporaba pisarne
- dva telefona, eden namenjen osebni uporabi

Širitev koncepta tudi na zasebnopravna razmerja.
Izvorno?

Is the privacy of a police officer who uses a business phone for non-business purposes protected?

Halford v. UK, 1987: YES

Important:

- there was no warning from the employer that the conversations could be intercepted
- exclusive use of the office
- two telephones, one for personal use

Extending the concept to private-person's relationships as well. Originally?

Koncept (razumnega) pričakovanja zasebnosti: vsebina Reasonable expectation of privacy: the concept

Subjektivni test: pričakovanje

izraženo navzven, razvidno drugim (npr. zaprta vrata, zavesa, zaprt prtljažnik, geslo na elektronski pošti...)

Objektivni test: opravičljivost

merila? moralna in druga ustaljena pravila v družbi...

Subjective test: expectation

expressed externally, visible to others (eg closed doors, curtains, closed trunk, e-mail password ...)

Objective test: justifiability

criteria? morals and other established rules, values in society ...

Koncept (razumnega) pričakovanja zasebnosti: problemi

Reasonable expectation of privacy: problems

1. vrednostna odprtost testa: katera pričakovanja (vrednote, interesi) šteti za razumna (družbeno sprejemljiva)?

2. (pravno)kulturno pogojeno razumevanje koncepta zasebnosti (zasebnost-kot-skrivnost)

3. subjektivni test:

- če pričakovanja posameznika -> v funkciji odpovedi pravici
-> nepotreben
- če pričakovanja družbe -> opravlja nalogu objektivnega testa -> nepotreben

4. nejasna uporaba:

- (pretežno) vključevalna funkcija?
- (pretežno) izključevalna funkcija?

5. neuporabnost v kontekstu sodobnega tehnološkega razvoja?

1. value openness of the test: which expectations (values, interests) are considered reasonable (socially acceptable)?

2. (legal) culturally conditioned understanding of the concept of privacy (privacy-as-secret)

3. subjective test, how understood?

- if expectations of the individual -> in the function of waiver -> unnecessary
- if the society's expectations -> performs the task of an objective test -> unnecessary

4. unclear use:

- (mostly) inclusionary function? Defining privacy
- (mostly) exclusionary function? Limiting privacy

5. useless in the context of modern technological development?

Primer 1: prometni podatki

Example 1: communication traffic data

ZDA: Smith v. Maryland (third party doctrine in prometni podatki)

ESČP: Malone v. UK (prometni podatki neločljivo povezani s komunikacijo)

USA: Smith v. Maryland (third party doctrine and traffic data)

ECtHR: Malone v. UK (traffic data inextricably linked to communication)

Primer 2: delovno mesto

Example 2: the workplace

Kako zagotoviti, da bodo delovna sredstva, ki so v lasti delodajalca, tudi uporabljena za potrebe delovnega procesa?

ZDA: delavcu prizna pričakovanje zasebnosti, a ta se mora podrediti "razumnim" posegom delodajalca

ESČP: delavcu se prizna pričakovanje zasebnosti; delod. ima možnost "odpraviti" razumnost pričakovanja zasebnosti (Barbulescu vs. Romunija)

How to ensure that employer-owned work tools are also used for work-related purposes?

USA: Recognizes the employee's expectation of privacy, but this must be subjected to "reasonable" interventions by the employer

ECtHR: the worker is expected to have privacy; employer has the ability to "eliminate" the reasonableness of the expectation of privacy (Barbulescu v. Romania)

Krovni 35 URS

Nedotakljivost telesne in duševne celovitosti

Zasebnost

Osebnostne pravice

Razmerje do drugih določb?

Varstvo zasebnosti po 35 URS je najširše

Posebni vidiki 36-38 URS ne izčrpajo varstva zasebnosti

General protection: Art. 35 URS

Inviolability of physical and mental integrity

Privacy

Personality rights

Relation to other provisions?

Privacy protection under 35 URS is the broadest

Special aspects 36-38 of the URS do not exhaust the full scope of privacy protection

Pravico do zasebnosti štejemo med osebnostne pravice

Značilnosti osebnostnih pravic?

Predmet varstva: elementi osebnosti

Nujni za svoboden ravoj in oblikovanje življenja

Primeri: pravica... do življenja, zdravja, duš. In tel. integritete, na lastni podobi, na glasu, do časti in dobrega imena, tudi osebne svobode...

The right to privacy is considered a personality right
Characteristics of personality rights?

Subject of protection: personality, autonomy

Necessary for free development and shaping of one's life

Examples: the right ... to life, health, mental and physical integrity, to one's own image, to one's voice, to honor and good name, to personal freedom ...

...

Skupno: pravica do samostojnega, svobodnega odločanja v lastnih zadevah

Svoboda v odločanju

Svoboda v ravnanju

Predpostavka: zanesljiv pregled nad informacijami o posamezniku, ki so znane njegovemu okolju

Common denominator: the right to independent, free decision-making in one's own affairs

Freedom in decision making

Freedom of action

Assumption: A reliable overview of the information about an individual that is known to his/her environment

Zasebnost v praksi USRS: primer odločbe U-I-272/98 (2003)

Privacy and the Slovenian Constitutional court: decision U-I-272/98 (2003)

1. Krog **intimnega delovanja**:

- celota ravnanj, razmerij, občutij,
- ki jih oblikuje posameznik
- **sam ali z drugimi**
- v intimni skupnosti

2. Samostojno odločanje posameznika, koga spustiti v ta krog

3. Varnost pred vdorom javnosti, drugih

Vidiki?

„osebne zadeve, ki jih želi ohraniti skrite in ki veljajo za take glede na ustaljena moralna in druga družbena pravila“

= koncept razumnega pričakovanja zasebnosti

»spolno življenje, zdravstveno stanje, zaupni pogovori med bližnjimi, dnevniški zapisi...«

= vsebinsko dopolnjen

"Personal matters which he wishes to keep hidden and which are regarded as such in accordance with established moral and other social rules"

= the concept of a reasonable expectation of privacy

"Sex life, health condition, confidential conversations between relatives, diary entries ..."

= substantially supplemented

Domet zasebnosti: stanovanje in varovani prostori

Scope of privacy: home, dwelling

“Stanovanje je nedotakljivo.” - 36 URS

Predpostavke vstopa v prostor in preiskave: odločba sodišča, pristanek, zakon (če nujno, da se neposredno prijetje storilca KD ali zavarovanje ljudi in premoženja)

Pravila izvajanja vstopa v prostor in preiskave
(navzočnost imetnika stanovanja/prostora, dve priči)

»Dwellings are inviolable.« - Art. 36 of Const.

Preconditions for entering and investigating the premises: court decision, or consent, or statute (if necessary to directly arrest the perpetrator or secure people and property)

Rules for entering and investigating the premises
(presence of the owner, two witnesses)

13. Izhajajoč iz namena jamstva je predmet varovanja **zaključena celota prostorov, ki jih oseba uporablja za bivanje, kjer živi sama ali skupaj z bližnjimi ter skrito pred očmi javnosti in kamor spusti le osebe, ki jim dovoli vpogled v najbolj skrita področja svojega življenja.** Gre za prostore, kjer oseba upravičeno pričakuje, da se jo pusti pri miru, ker je tam doma. V tem smislu je treba razumeti pojma "stanovanje" in "drugi tuji prostori", uporabljeni v 36. členu Ustave. Tudi pravica iz tretjega odstavka 36. člena Ustave se zato nanaša na preiskavo stanovanja in drugih prostorov v opisanem smislu izrazov.

- Up-430/00

13. Pursuant to the purpose of the guarantee, the subject of protection is the **complete set of spaces used by a person for living, where he lives alone or with loved ones and hidden from public view and where only persons who allow them access to the most hidden areas of his life. These are places where a person justifiably expects to be left alone because he or she is at home there.** In this sense, the terms "apartment" and "other foreign premises" used in Article 36 of the Constitution must be understood. The right from the third paragraph of Article 36 of the Constitution therefore also refers to the search of an apartment and other premises in the described sense.

- Up-430/00

Domet zasebnosti: komunikacijska zasebnost

Scope of privacy: correspondence

“Zagotovljena je tajnost pisem in drugih občil.” - 37
URS

Predpostavke dopustnosti posegov:

- določenost v zakonu (lex certa)
- sodna odločba
- časovna omejenost
- neizogibno
- za uvedbo/potek kaz.postopka ali za varnost države

»The privacy of correspondence and other means of communication shall be guaranteed.« - Art. 37 of the Const.

Assumptions of admissibility of interventions:

- established by law (lex certa)
- court decision
- time constraint
- inevitability
- for the purpose of law-enforcement or for purposes of state security

Komunikacija?

Correspondence?

7. Ustava v prvem odstavku 37. člena, s katerim zagotavlja tajnost pisem in drugih občil, varuje svobodo komuniciranja. Ta pravica zagotavlja varstvo posameznikovega **interesa**, da se brez njegove privolitve **nihče ne seznani z vsebino** sporočila, ki ga posreduje prek kateregakoli **sredstva**, ki omogoča izmenjavo oziroma posredovanje informacij, kot tudi **interesa** posameznika, da **svobodno odloča o tem, komu, v kakšnem obsegu, na kakšen način in pod kakšnimi pogoji bo posredoval določeno sporočilo**. Gre za varstvo svobodne in nenadzorovane komunikacije in s tem zaupnosti razmerij, v katere pri sporočanju stopa posameznik.

8. Področje varstva komunikacijske zasebnosti se razširja na pisma in druga občila (npr. telefon, telefaks, računalnik) ter obsega **posredovanje** pisnih, zvočnih ali slikovnih sporočil oziroma drugih sporočil s subjektivno sporočilno vrednostjo.

- Up-106/05

7. In the first paragraph of Article 37, which ensures the secrecy of letters and other media, the Constitution protects the freedom of communication. This right ensures the protection of the individual's interest so that, without his consent, no one becomes aware of the **content** of the message conveyed by any **means** enabling the exchange or transmission of information, as well as the individual's interest in freely deciding to **whom, to what extent, in what way and under what conditions it will convey a particular message**. It is about protecting free and uncontrolled communication and thus the confidentiality of the relationships that an individual enters into when communicating.

8. The field of protection of communication privacy extends to letters and other media (eg telephone, fax, computer) and includes the **transmission of written, audio or visual messages or other messages with a subjective message value**.

“Osebni podatek je torej katerikoli podatek o posamezniku; oblika ni pomembna. **Bistveno je le, da se podatek nanaša na točno določenega ali vsaj določljivega posameznika.** DNK oziroma na podlagi njene analize pridobljeni podatki pomenijo najintimnejšo, trajno in nespremenljivo vez s točno določenim posameznikom. Enako torej velja tudi za profil DNK, ki brez dvoma izpolnjuje navedena merila. Kljub svoji reducirani obliki profil DNK omogoča identifikacijo (ozioroma je prav temu tudi namenjen) in je že zgolj zaradi tega osebni podatek.”

- U-I-312/11

“Personal data is therefore any data about an individual; the shape is not important. **It is only essential that the data refers to a specific or at least identifiable individual.** DNA, or the data obtained on the basis of its analysis, means the most intimate, lasting and unchanging bond with a specific individual. The same therefore applies to the DNA profile, which undoubtedly meets the above criteria. Despite its reduced form, the DNA profile allows identification (or is intended for that purpose) and is personal data for that reason alone.”

Domet zasebnosti: delo vs. prosti čas

Scope of privacy: professional activities vs. rest&recreation

There appears, furthermore, to be **no reason of principle why this understanding of the notion of "private life" should be taken to exclude activities of a professional or business nature** since it is, after all, in the course of their working lives that the majority of people have a significant, if not the greatest, opportunity of developing relationships with the outside world. This view is supported by the fact that, as was rightly pointed out by the Commission, it is not always possible to distinguish clearly which of an individual's activities form part of his professional or business life and which do not. /.../

- Niemietz v. Nemčija (Germany)

37. In the absence of a warning that one's calls would be liable to monitoring, the applicant had a reasonable expectation as to the privacy of calls made from a work telephone /.../ and the same expectation should apply in relation to an applicant's e-mail and Internet usage /.../

- Barbulescu v. Romunija (Romania)

Domet zasebnosti: nadzor na javnih površinah

Scope of privacy: surveillance in public

57. There are a number of elements relevant to a consideration of whether a person's private life is concerned by measures effected outside a person's home or private premises. **Since there are occasions when people knowingly or intentionally involve themselves in activities which are or may be recorded or reported in a public manner, a person's reasonable expectations as to privacy may be a significant, although not necessarily conclusive, factor.** A person who walks down the street will, inevitably, be visible to any member of the public who is also present. **Monitoring by technological means of the same public scene /.../ is of a similar character.** Private-life considerations may arise, however, once **any systematic or permanent record comes into existence of such material from the public domain.**

- P.G. in J.H. v. Združeno kraljestvo (United Kingdom)

C. Nove tehnologije, varstvo privilegija zoper samoobtožbo in pravice do zasebnosti

New technologies, protection of privilege against self-incrimination and of the right to privacy

Zasebnosti in privilegij sta po vsebini tesno povezana... Privacy and privilege are closely related ...

We have already noticed the intimate relation between the two amendments. They throw great light on each other. For the 'unreasonable searches and seizures' condemned in the fourth amendment are almost always made for the purpose of compelling a man to give evidence against himself, which in criminal cases is condemned in the fifth amendment; and compelling a man 'in a criminal case to be a witness against himself,' which is condemned in the fifth amendment, throws light on the question as to what is an 'unreasonable search and seizure' within the meaning of the fourth amendment. And **we have been unable to perceive that the seizure of a man's private books and papers to be used in evidence against him is substantially different from compelling him to be a witness against himself.**

- Boyd v. US, 1886

... yet separate

If the Fifth Amendment protected generally against the obtaining of private information from a man's mouth or pen or house, its protections would presumably not be lifted by probable cause and a warrant or by immunity. The privacy invasion is not mitigated by immunity; and the Fifth Amendment's strictures, unlike the Fourth's, are not removed by showing reasonableness. The Framers addressed the subject of personal privacy directly in the Fourth Amendment. They struck a balance so that, **when the State's reason to believe incriminating evidence will be found becomes sufficiently great, the invasion of privacy becomes justified and a warrant to search and seize will issue. They did not seek in still another Amendment -- the Fifth -- to achieve a general protection of privacy, but to deal with the more specific issue of compelled self-incrimination.**

- Fisher v. US, 1976

69. The right not to incriminate oneself is primarily concerned, however, with respecting the will of an accused person to remain silent. As commonly understood in the legal systems of the Contracting Parties to the Convention and elsewhere, **it does not extend to the use in criminal proceedings of material which may be obtained from the accused through the use of compulsory powers but which has an existence independent of the will of the suspect** such as, inter alia, documents acquired pursuant to a warrant, breath, blood and urine samples and bodily tissue for the purpose of DNA testing.

Domet privilegia zoper samoobtožbo: izjave

Scope of the privilege against self-incrimination: statements

... je Ustavno sodišče že v odločbi št. Up-134/97 /.../ navedlo, da je bistvo privilegia zoper samoobtožbo v povezavi s prepovedjo izsiljevanja izpovedb v tem, da morajo organi pregona v najširšem smislu obdolžencu pustiti, da je povsem pasiven oziroma da se sam zavestno, razumno in predvsem prostovoljno odloča, ali bo z njimi sodeloval ali ne. **To pomeni, da obdolžencu ni treba izjaviti ničesar v zvezi s kaznivim dejanjem, ničesar, s čimer bi se inkriminiral ali s čimer bi se lahko inkriminiral proti svoji volji.** Gre torej za preprečevanje, da bi obdolženi izpovedal zoper samega sebe, bodisi zaradi prisile bodisi zaradi neinformiranosti, misleč, da mora izpovedati. Tako to ustavno procesno jamstvo državi preprečuje prisiliti posameznika, da postane vir dokazov zoper samega sebe. Bistvo privilegia zoper samoobtožbo je ohraniti obdolženčeve procesno subjektiviteto in tem pošten postopek./.../

- Ustavno sodišče RS, Up-1293/08

/ ... the Constitutional Court already in decision no. Up-134/97 /.../ stated that the essence of the privilege against self-incrimination in connection with the prohibition of extortion of confessions is that law enforcement authorities in the broadest sense must leave the defendant completely passive or that he consciously, reasonably and above all it decides voluntarily whether to cooperate with them or not. **This means that the defendant is not required to declare anything in relation to the offense, anything to incriminate himself or to incriminate against his will.** It is therefore a matter of preventing the accused from confessing against himself, either out of coercion or out of ignorance, thinking that he must confess. Thus, this constitutional procedural guarantee prevents the state from forcing the individual to become a source of evidence against himself. The essence of the privilege against self-incrimination is to preserve the defendant's procedural subjectivity and thus a fair procedure./.../

The Court notes that the customs secured Mr Funke's conviction in order to obtain certain documents which they believed must exist, although they were not certain of the fact. **Being unable or unwilling to procure them by some other means, they attempted to compel the applicant himself to provide the evidence of offences he had allegedly committed.** The special features of customs law /.../ cannot justify such an infringement of the right of anyone "charged with a criminal offence", within the autonomous meaning of this expression in Article 6 (art. 6), to remain silent and not to contribute to incriminating himself.

Kako preiskovati: "analogni" odgovor

How to investigate: the "analogue" solution

" /.../ Iz ZKP nadalje izhaja, da policija pri izvedbi zasega ne sme uporabiti sredstev, predvidenih v drugem odstavku 220. člena ZKP za izsiljene izročitve (denarna kazen, zapor). Tako razumevanje potrjuje že logična razlaga zakonskih določb. Zaseg sme namreč policija opraviti le, če je neodložljiv, učinkovanje denarne kazni in zapora pa vselej terja čas. **V primeru, ko oseba določene stvari na zahtevo ne izroči, mora torej policija, ki hoče priti do te stvari, opraviti preiskavo prostora ozioroma osebe, kjer se stvar nahaja.** To hkrati pomeni, da morajo biti - če naj bo zaseg dopusten - izpolnjeni tudi zakonski pogoji za izvedbo take preiskave.

- odločba Ustavnega sodišča RS, Up-62/98

(ne problematizira ureditve edicijske dolžnosti)

"/.../ It further follows from the CPC that the police may not use the means provided for in the second paragraph of Article 220 of the ZKP for forced production of items (fines, imprisonment). **If the person does not hand over a certain item on request, the police who want to seize the item must conduct an investigation of the place or person.** At the same time, this means that, if the seizure is to be admissible, the legal conditions for carrying out such an investigation must also be met.

Interim conclusion

1. Domnevni storilec je **varovan pred prisiljevanjem k sodelovanju** z organi kazenskega postopka, tj. pred prisiljevanjem k vlogi aktivnega dokaznega vira.
2. **Posegi v zasebnost ali sodelovanje tretjih oseb ne terjajo sodelovanja**, aktivnosti domnevnega storilca (ne ogrožajo pasivnosti domnevnega storilca)
3. Krepitev (ohranitev) varstva privilegija zoper samoobtožbo praktično neizogibno vodi v
 - (i) krepitev posegov v zasebnost domnevnega storilca, in
 - (ii) krepitev dolžnosti sodelovanja tretjih oseb.

1. The alleged perpetrator is **protected from coercion to cooperate** with the authorities of criminal proceedings, ie. from being compelled to act as an active source of evidence.
2. **Interference with the privacy or participation of third parties** does not require the participation, activities of the alleged perpetrator (does not endanger the passivity of the alleged perpetrator)
3. Strengthening (maintaining) the protection of the privilege against self-incrimination practically inevitably leads to
 - (i) strengthening the interferences of the privacy of the alleged offender, and
 - (ii) strengthening the duty of third parties to cooperate with law-enforcement.

How to investigate: technological development and encryption

Primer:

Policija osumljencu zaseže mobilni telefon. Telefon je zavarovan z gesлом, vsebina pa šifrirana. Osumljenec noče zagotoviti dostopa do telefona.

Primer:

Policija tekom izvajanja prikritih preiskovalnih ukrepov prestreže tudi osumljenčovo elektronsko pošto. Policisti ugotovijo, da je vsebina šifrirana.

Kako lahko preiskovalci pridejo do vsebine mobilnega telefona / elektronske pošte?

Example:

Police seize the suspect's mobile phone. The phone is password protected and the content is encrypted. The suspect refuses to provide access to the phone/data.

Example:
